Born in Sabadell (Barcelona), Albert has always been in contact with film and photography. Influenced by his father, the latter aroused interest in him. This has led him to graduate in Audiovisual Design at ESDi (Escola Superior de Disseny) in his hometown. A place where he has met people from other disciplines within the world of design. At the same time, Albert takes advantage of his hours to improve his knowledge and skills in audiovisual projects.

Not only has he limited himself to working in the audiovisual sector, but he has been working as a photographer in different companies. As in every field of art, each artist has their own style and this is associated with their work. An experience of discoveries that evolves in parallel and that forever marks his career, but also his personal goals. Where under the gaze of a colorblind, it is about representing the world with dynamism and creativity. Now he move to Cork (Ireland) where he will try to still work and developing his skills.
